A BRAND OF CAPREY SAS

Own AI, not rented.

Private Executive — an AI that knows your world, decides like you, and is yours.

Own AI beats rented AI — and the window is open now.

The race for compute, energy and resources is only just beginning. Renting your thinking from a provider is the dependency everyone is about to feel. We break it: the machine, the weights and the record are yours. Not a promise — a fact we live on daily.

One roof, three steps — everything in plain view.

- **Private Assistance** — a personal assistant that installs itself · USD 2,000 · coming soon.
- **Private Executive** — your whole operation, run by a staff that is yours · USD 5,000 / 7,500 / 10,000 + VAT · available now. Founder places: 1–10, 11–20, from 21.
- **Company Spawn** — several companies on one backbone · in preparation.

The cook eats in his own restaurant.

Caprey is a two-person company. That two people run three websites, a video channel, several products and the whole administration — books, receipts, CRM, contracts — is only possible because we run our own company on Private Executive, day to day. We sell nothing we don’t use ourselves. It works, or none of this would exist.

Caprey SAS — the entity already exists.

A registered Argentine company that incubates brands: the entity, the licences, the invoicing and the operations are in place. Three brands: Private Executive, SolAleman (solar) and Reraise (the open card network). CUIT 30-71907992-6 · registered importer · MiPyME 2026.

Company Spawn — scale without our hours.

The same machine we run ourselves, pointed at the next company: several companies on one shared backbone — not ten separate stacks. The download product scales without our time. That is how this grows beyond the founders’ hours.

Build this with us.

- Sales & license partner — carry Private Executive to your own clients, in your own region; you keep the relationship, we carry the product, setup and support. Europe is our strongest market and opens through a licensed partner on the ground — the first one in sets the terms. The commission is shared once you register.
- Investor — a finished product, in daily production use. It scales without our hours, and it belongs to whoever runs it — a position that holds as sovereignty stops being a luxury.

This is sold by talking.
